**Note:** The glazing material (Thermoclear®) used is ideal for humid environments, however it differs from glass in that it's not sealed, therefore condensation may form in the cellular walls when interior/exterior temperatures are such that dew point temperatures are created (usually in periods of cooler weather). This condensation usually disappears when warmer weather returns.

### LEXAN POLYCARBONATE OPTIONS

Available in clear sheet only - 3mm and 6mm single pane.

## ACRYLIC
